

## THE COMPANY

Since 1986, TG3 Electronics has helped customers operate their businesses more efficiently and effectively by improving business performance and productivity. The company does this by designing, implementing, and supporting superior engineering input solutions. TG3 specializes in the following solutions for both standard and custom keyboards, bump bars, control panels, and custom display devices.

## CAPABILITIES

TG3 has a team of engineers that are based in the US. The engineering team is made up of mechanical, electrical, PCB layout, and software designers. By having this wide array of engineers, TG3 is capable of meeting a customer's design requirements, product specifications, and manufacturing costs.

TG3 has both domestic and off-shore manufacturing sites to best fit the needs of its customers.

Having a global manufacturing presence allows TG3 the flexibility to drop ship directly to end users from anywhere in the world. TG3 is able to do a full or partial drop ship, depending on the customers' needs.
